

In the following example, part of the name of the station was entered in the Name field.

The first three letters of the station are Pie. **Name:**

The results show that six RAWS have pie in their name, but not necessarily at the beginning of the name.

The screenshot shows a web interface with a light green background. At the top left, the text "Selection Criteria" is displayed. To its right is a button labeled "Change Selection Criteria". Below the criteria text, there are two bullet points: "Name contains: pie" and "Status: Active, Deactive or Proposed". Below this is a table with three columns: "State", "NESDIS ID", and "Station". The table contains five rows of data. Each row has a button next to the station name.

State	NESDIS ID	Station
CA	3248248C	PIERCE
ID	32374254	PIERCE
MO	32567706	PIEDMONT
SD	3231B21E	FORT PIERRE
SD	521167F6	MAGPIE CREEK

When you click on the button labeled with the station name, you will go to the Station page with more information associated with the station. Station information is discussed in lesson 5.
